BLOCK MANIFOLD

Designed to distribute and control fluid flow within hydraulic or lubrication systems, ensuring efficient and reliable operation. Compact, durable, and suitable for various industrial applications.

P CLAMP

Designed to securely hold and organize pipes, hoses, or cables, ensuring stability and reducing vibration. Durable and suitable for various industrial applications.

GREASE PUMP TANK

Designed to store and supply grease efficiently for lubrication systems, ensuring consistent flow and reliable performance. Durable and suitable for various industrial applications.

CUSTOM SPROCKET

Designed to meet specific operational requirements, ensuring precise power transmission and optimal performance. Manufactured for durability and compatibility with various industrial applications.

HOSE OIL & DIESEL

Designed to transfer oil efficiently with high resistance to pressure and abrasion. Reliable for various industrial applications.

BELDEN CABLE

High-quality cable designed for stable signal transmission and durability in industrial environments. Reliable and long-lasting performance.

FINE FILTER BIODIESEL

Designed to remove fine particles and contaminants, ensuring cleaner fluid and improved system performance. Suitable for precision filtration.

FILTERBAG BIODIESEL

Designed for efficient solid-liquid separation, capturing particles while maintaining smooth flow. Durable and ideal for various filtration systems.

INSTALLATION MACHINE

Professional installation of industrial equipment and systems, ensuring correct setup, safe operation, and optimal performance. Carried out by experienced technicians with attention to detail and compliance with industry standards.

MAINTENANCE SERVICES

Routine and preventive maintenance to ensure equipment reliability, minimize downtime, and extend service life. Includes inspection, servicing, and performance optimization for various industrial systems.
